The Illinois EPA reviews projects to evaluate the need for permits and necessary environmental controls. In order to expedite the necessary review, please provide with the following information:

1. Identify materials, productions processes and products for the proposed project:  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

2. Quantify anticipated production rates:  
\_\_\_\_\_  
\_\_\_\_\_  
\_\_\_\_\_

3. Quantify new or additional employees:

---

---

---

4. Quantify anticipated water use and wastewater discharge (existing and new). Also identify if new water main and/or sewer construction will be necessary to service the project:

---

---

---

5. Determine whether sewer or water main connections or extensions will be required, identify pretreatment facilities, and identify tributary treatment plant:

---

---

---

6. Identify anticipated quality of wastewater (include characteristics), indicate whether domestic or industrial wastewater:

---

---

---

7. Identify volume and types of hazardous or solid waste generated:

---

---

---

8. Identify probability that wastes or contamination is present in the buildings or property (e.g., abandoned underground fuel tank):

---

---

---

9. Does the project include any equipment that can cause air pollution (e.g., boiler, incinerator, storage tanks or manufacturing processes can cause air pollution):

---

---

---

10. Identify air emission sources, control equipment, and quantity:

---

---

---

11. Name and contact information of manufacturer's representative, plant manager or environmental engineer:

---

---

---
