

Illinois Film Office Sustainable Production Wrap Report- Narrative Summary

- 1) Detailed Narrative Description of project, production dates, 3rd party vendor information, total score on score sheet, etc.

Hired a full-time, third-party Sustainability Production Professional—verified and pre-approved by the Illinois Film Office—to manage sustainability planning and implementation.

Did your budget planning include sustainability staff and expenses?

Did your budget incorporate sustainability best practices into vendor contracts.

ENERGY

On location, did you utilize a minimum of 33% home power or tie into the grid instead of using generators?

SAMPLE

Generators for Basecamp/Location Power (>30kW) are [40%] battery electric units (BESS) or 40% hydrogen or 60% hybrid BESS/generators for on-location and base camp use.

TRANSPORTATION AND TRAVEL

At least [25%] of trailers for hair and makeup, wardrobe, talent and honey wagons are fully solar-powered, OR the basecamp is powered by clean mobile power such as BESS, HPUs, or utilizes grid tie-ins or power drops for [25%] of on-location filming days. (projects that do not use fossil fuel vehicles qualify)
